

熱保液

- ~Keeps pools warmer, longer
- ~Save money, time, water & energy
- ~Safe for filters, skimmers & pumps
- ~Reduce water & heat loss by up to 50%
- ~Lower energy usage by up to 40%
- ~Salt water & ozone compatible

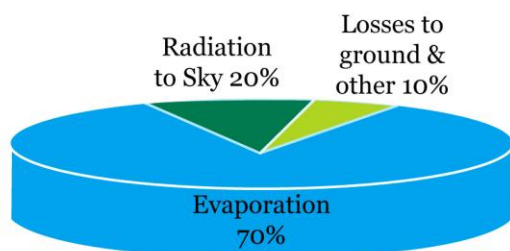

熱保液 (Heat\$avr™) 是一種簡單而容易生物分解的合成物，它是無味，無副作用，透明的液體，用作泳池覆蓋，能有效地減少因池面蒸發引致的熱量及水份流失，從而減低室內泳池空氣中的濕度，及泳池加熱，抽濕所需耗用的大量能源。

熱保液能為你節省能源,節省開支!

All swimming pools lose heat and energy through evaporation. Heatsavr™ slows evaporative loss, keeping the heat in the pool and saving energy and water. Pools with gas or electric heaters, heat pumps, solar systems or no heater at all will benefit by reducing heat loss.

Seventy percent (70%) of total heat loss from pools and spas is due to evaporation. The US Department of Energy advises a pool blanket be used to achieve energy savings and heat retention.

Plastic Pool Blankets vs Liquid Solar Pool Cover

Benefits Comparison

	Plastic Pool Blanket (傳統膠池毯)	Heatsavr™ & Ecosavr™ (泳池熱保液)
Application (應用)	Manual application is time consuming, potentially complicated and requires one or more people. Requires a considerable amount of space for storage and rollers. 人手操作費時，可能需要多過一個人操作，且需大量之儲存空間。	Automatic, hands-free easy application that requires absolutely no storage and no labor to apply. 加添熱保液可人手或全自動量計注入，所需之儲存空間甚少。
Effectiveness (效用)	Savings of 50-70% can be achieved but only when the cover is correctly covering the pool! There can be no savings if the cover is not in use. It is very difficult to find a traditional pool cover to protect your uniquely shaped pool, and impossible to cover around fountains and/or waterfalls. 只有覆蓋十分密實才能有效，但對不規則之水池或自動化瀑布/噴泉式水療池，節能效率很低甚至無法使用。	Savings of up to 45% can be achieved 24 hours a day, 7 days a week. You will be fully covered, even when the pool is in use! A liquid solar pool cover forms itself to any shape you can create, and even works around your fountains and waterfalls. 熱保液能自動在池面擴散，適用於任何形狀及呎吋之水池或瀑布/噴泉式水療池等，節能效率高達45%。
Esthetics (美觀)	Even a high quality plastic pool blanket diminishes the beauty of your yard, whether it is covering your pool or rolled up beside it. 無論任何優質池毯亦會影響原先之美觀設計。	The liquid cover is entirely transparent and allows your pool to look its natural best all day, every day. 熱保液是完全透明液態，故可保持原有外觀。
Safety (安全)	While a pool cover is in use, there is always a risk that a child or beloved pet will become trapped under the cover. While a cover is being removed or is in storage, there is a risk of injury or entanglement. 覆蓋的泳池可能構成危險陷阱，萬一小童或寵物滑落水池，因池毯覆蓋而不能被及時發現。而在開收池毯時，操作員工亦會有機會受傷。	Heatsavr™ and Ecosavr™ are safe for all pool users. Pool owners and operators can relax, knowing that their pool is safely covered at all times. 透明熱保液全天候覆蓋泳池，故業主或泳客，救生員等，任何時間皆感安全，輕鬆。
Cost (成本)	A plastic pool blanket can cost hundreds of dollars for the blanket alone, with extra costs mounting for unique design, automation and storage equipment. 首次購買費用高昂，日常運作及存放亦耗時空。	Heatsavr™ and Ecosavr™ have a proven 6:1 rate of return and, with no extra or hidden costs! 購買費用低廉，由多年用戶經驗證明，熱保液回報率為 1:6，效益高，亦不再有額外成本。

Heat\$avr™ is added directly to the pool water at a rate of 1oz per 400 sq. ft. of surface area, can be applied either manually or use our Automatic Metering System.
